

SIMPLIFY AT-HOME TESTING

Easy At-Home Testing Solutions

IHD Lab's advanced API platform, LabFlow, revolutionizes the lab integration process to deliver At-Home Testing services directly to your customers. In addition to testing, LabFlow makes it easy to connect to IHD Lab's full suite of lab services including ordering, results, kit assembly, and fulfillment.

85+ At Home Tests in All 50 States

Our validated At Home Tests across Women's Health, Men's Health, Infectious Disease, and Wellness, support use cases across a variety of partners, retailers, and providers. Whether it's self collection, at-home phlebotomy, or traditional blood draws we'll work with you to build a testing program that works for your patients.

A Trusted Lab that Delivers Results

With over a decade of lab expertise, IHD Lab stands as a trusted, reliable partner with a commitment to customer service, clinical quality and a true collaboration with our clients.

“The **LAB** with Smarts”

RETAIL OFFERING

At-home kits are sold by a retailer, either online or in store. The example below is for an online marketplace, but flow would be similar in-store

PHYSICIAN ORDER

Typically part of a telehealth program, testing is ordered by physician as part of overall treatment program

LAB SERVICE ONLY

In this scenario, digital health / retail partner is responsible for all ordering, kitting, while IHD is responsible only for the lab portion of the workflow.
