

## From Living Room to our Lab

With over a decade of lab expertise, IHD Lab stands as a trusted and reliable partner committed to customer service, clinical quality, and true collaboration with clients. Our advanced API platform, LabFlow, revolutionizes the lab integration process by delivering At-Home Testing services directly to customers, seamlessly connecting to IHD Lab's comprehensive suite of lab services, including ordering, results, kit assembly, and fulfillment.

We offer easy At-Home Testing solutions with validated tests across Women's Health, Men's Health, Infectious Disease, and Wellness, supporting a variety of partners, retailers, and providers.

Whether it's self-collection, at-home phlebotomy, or traditional blood draws, we work with you to build a testing program tailored to your patients' needs. For pricing and our Full Test Menu, contact us at: [DaaS@ihdlab.com](mailto:DaaS@ihdlab.com).
