

Accurately Diagnose Respiratory Infections

Respiratory ailments often rank as a primary worry for both patients and healthcare providers.

However, numerous respiratory pathogens manifest with strikingly similar symptoms, rendering it exceedingly difficult to pinpoint the exact infection merely through symptom analysis.

IHD Lab's infection testing solutions serve as first-line defenses, aiding clinicians in swiftly identifying respiratory infections, thereby facilitating critical patient management decisions.

- Molecular technique provides greater accuracy than culture
- One swab solution
- 24-48hr turnaround time upon receipt of specimen
- Post-collection test add-ons options available
- No refrigeration required

Respiratory Pathogen Panel, Comprehensive

4190

UTM Swab Collection

Bordetella spp.	Bacteria
Bordetella pertussis	Bacteria
Chlamydomphila pneumoniae	Bacteria
Haemophilus influenzae	Bacteria
Klebsiella pneumoniae	Bacteria
Legionella pneumophila	Bacteria
Mycoplasma pneumoniae	Bacteria
Staphylococcus aureus	Bacteria
Streptococcus pneumoniae	Bacteria
Adenovirus	Virus
Human Coronavirus 229E	Virus
Human Coronavirus HKU1	Virus
Human Coronavirus NL63	Virus
Human Coronavirus OC43	Virus
Human Enterovirus (pan assay)	Virus
Human Enterovirus D68	Virus
HHV4 (Epstein-Barr Virus)	Virus
HHV5 (Cytomegalovirus)	Virus
HHV6 (Human Herpesvirus 6)	Virus
Human Metapneumovirus (hMPV)	Virus
Influenza A (Pan)	Virus
Influenza A/H1-2009	Virus
Influenza A/H3	Virus
Influenza B	Virus
Human Parainfluenza Virus 1	Virus
Human Parainfluenza Virus 2	Virus
Human Parainfluenza Virus 3	Virus
Human Parainfluenza Virus 4	Virus
Respiratory Syncytial Virus A (RSV A)	Virus
Respiratory Syncytial Virus A (RSV B)	Virus
Rhinovirus	Virus
SARS-CoV-2	Virus
